Professional Experience

Owner Psychologist

Green Mountain Psychology PLLC. Private practice owner conducting evaluations with children, adolescents, and adults to clarify mental health issues affecting functioning. Conducting neuropsychological assessment for individuals with traumatic brain injuries, epilepsy, and neurodevelopmental differences. Working with school districts in Vermont evaluating students for special education or 504 Plans and consulting on recommendations. Conducting threat assessment and risk of future violence in juveniles in school settings. Conducting diagnostic interviews and comprehensive evaluations for Social Security Disability. Assessing individuals with worker's compensation claims to measure impairment. Offering psychotherapy services for children and adolescents. August 1, 2020, to Present.

School Psychologist

Burlington School District, Burlington, Vermont. Assessed the cognitive abilities of English Language Learners (ELLs) and other students. Accurately diagnosed learning and intellectual deficits in ELL students, and recommended appropriate interventions to the Child Support Team. Led teams in threat assessments and conducted interviews of students, witnesses, and families.

Collaborated with peers to introduce and maintain Restorative Practices (RP) in the school-wide culture. Carried a heavy caseload to bring evaluations up-to-date that were delayed due to the Coronavirus pandemic and the Vermont governor's order that schools shut down in March 2020. Evaluated students at Flynn Elementary School with delayed evaluations, evaluations due in fall 2020, and initial fall 2020 evaluations. Worked closely with special and general educators at Flynn Elementary School to craft behavior plans for students with emotional and behavioral difficulties. August 2019- November 2020.

Clinician

Maple Leaf Clinic in Wallingford, Vermont. Identified via differential diagnosis of causes of behavioral disorders in children, adolescents, and adults. Recommended research-based interventions that resulted in improvement. Used neuropsychological test batteries to identify brain damage or neurodevelopmental differences and identified appropriate treatment interventions. Evaluated clients seeking bariatric surgery and other medical interventions, and made recommendations to health care teams. Worked with a variety of individuals with mental health disorders, kept them calm, identified the underlying problems, and explained the problems in detail to the Vermont Social Security Disability Department, enabling them to make accurate determinations. In therapy, helped children and adolescents deal with chaos and stress in their personal lives, resulting in improved behavior at home and in school. 5/2015 to 7/2019.

School-based Clinician

Mount Holly Elementary School in Mount Holly, Vermont. Built self-esteem in children with learning disorders, and helped children with behavior disorders learn to modulate their emotions and actions. 2017-2018 school year.

Professional Internships

Maple Leaf Clinic in Wallingford, Vermont. 2014/2015. 600 pre-master's degree hours under the supervision of Jonathon Gilmore. Used clinical skills to work with and evaluate children ages 6 through 19 using cognitive batteries, neuropsychological batteries, and personality projective assessments.

Vermont Forensic Assessment in Shelburne, Vermont. 2013/2014. 400 pre-master's degree hours under the supervision of licensed clinical psychologist Dr. John C. Holt. Clinical interviewing and various assessment tools to evaluate clients and write reports regarding capacity to parent, risk of sexual violence, and fitness to stand trial, among others.

Scope of Practice

Specializing in the psychological, neuropsychological, and psycho-educational evaluation of children, adolescents, and young adults. Services provided include testing and assessment for medically necessary, educational, and forensic purposes. Therapy services for children and adolescents. Therapeutic Orientation with children utilizes theories from developmental psychology and includes techniques from play and drama therapy. Therapeutic Orientation with adolescents and young adults is client-centered and uses Gestalt and cognitive behavioral therapy techniques.

Areas of interest and expertise include:

- Pediatric Neuropsychology
- Effects of Cancer Treatment on Neuropsychology
- Developmental Trauma and PTSD
- Traumatic Brain Injury
- Autism in Women and Girls
- Attention Deficit Hyperactivity Disorder
- Learning Disabilities
- English Language Learning
- Assessment of Threat
- Juvenile Delinquency & Risk of Recidivism

Additional Professional Teaching Experience
